E-mail: jenniferzhang@berkeley.edu

Homepage: <https://jenjzhang.github.io/>

Address: Gateway Building, Department of Statistics, University of California, Berkeley

Research Interests

AI evaluation · Causal inference · AI safety · Algorithmic accountability in high-stakes decisions

Education

2025–	Ph.D. in Statistics, University of California, Berkeley Berkeley Fellowship for Graduate Study, 2025–2026
2021–2025	B.S. in Mathematics; B.S. in Artificial Intelligence and Decision Making, Massachusetts Institute of Technology GPA: 4.9/5.0

Publications

Journal papers

- (j1) Prediction of Oil and Gas Well Integrity Using Well Construction Physical Parameters and Geospatial Metrics. Y. Li*, **J. Zhang**, et al. (14 authors). *Energy & Fuels*, Article ASAP, 2024

Workshop papers

- (w1) Can We Trust What We Measure? Auditing LLM Validity-Awareness in Predictive Modeling. **J. Zhang**, A. Coston. *NeurIPS Workshop on Trust-AI-Eval (TAE): Can We Trust AI Evaluation?*, Sydney, 2026.
Non-archival

Posters & non-archival presentations

- (p2) Subject-Level Calibration Heterogeneity is Stable Across LLM Families and Scales: A Statistical Audit of MMLU. **J. Zhang**, J. Wright. *Poster, STAI-X 2026, Harvard University*, 2026
- (p1) Uncertainty Quantification of Diffusion Coefficient Estimation. **J. Zhang**. *Abstract accepted, Joint Mathematics Meetings 2025; poster presented at the CMU SUAMI REU Symposium*, 2024

Positions

2026	Graduate Researcher, University of California, Berkeley, USA Auditing whether LLM coding assistants recognize decision-dependency failures in predictive modeling (with Amanda Coston) Statistical audit of subject-level calibration heterogeneity in large language models on MMLU
2024	NSF REU Fellow, CMU Summer Undergraduate Applied Mathematics Institute (SUAMI), Pittsburgh, USA Uncertainty quantification for diffusion coefficient estimation; selected as 1 of 11 students
2024	Undergraduate Researcher, MIT Mobile Technology Lab & Massachusetts General Hospital, Cambridge, USA Cluster analysis of wearable sensor data to study stress in drug addiction patients
2023	Machine Learning Intern, E.SUN Bank, Taipei, Taiwan Built a bank-law QA chatbot using retrieval-augmented language models with a novel index-tree retrieval architecture
2023	Trading Track Participant, Jane Street INSIGHT Program, New York, USA Selected as 1 of 30 students; developed team trading strategies for an electronic mock trading competition
2023	Undergraduate Researcher, MIT Department of Civil and Environmental Engineering, Cambridge, USA Machine learning models to predict methane emission from oil and gas wells

Teaching

2025	Teacher, MIT Global Teaching Labs, Cowbridge Comprehensive School, Wales, UK
2024	Grader, 6.3800: Introduction to Inference, MIT
2018–20, 2022	Math Instructor & Teaching Assistant, MathCounts/AMC 8 courses, AlphaStar Academy

Service

2026–	Treasurer, UC Berkeley Statistics Graduate Student Association (SGSA)
2021–2025	Schedules Officer, Outreach Officer, Harvard-MIT Math Tournament Oversaw scheduling and logistics for 1500+ competitors, 100+ staff, and 200+ volunteers; directed competition-week operations and a financial aid initiative for participants

Reviewing

NeurIPS Workshop on Trust-AI-Eval (TAE) (2026), ICML AI4GOOD Workshop (2026)
